

Serial No.: 10/716,204

IN THE CLAIMS:

Please amend the claims as follows:

1. (Original) A nucleic acid segment comprising an isolated gene encoding a lipoxygenase, said lipoxygenase containing an iron ligand comprising a serine.
2. (Original) The nucleic acid segment of claim 1, wherein said isolated gene encodes a polypeptide having an in vivo molecular weight of about 76 KD when measured by SDS-PAGE.
3. (Currently Amended) The nucleic acid segment of claim 1, wherein the encoded lipoxygenase ~~converts arachidonic acid exclusively to 15S-hydroperoxyeicosatetraenoic acid or~~ converts arachidonic acid exclusively to 8S-hydroperoxyeicosatetraenoic acid.
4. (Currently Amended) The nucleic acid segment of claim 1, wherein the isolated gene encodes ~~15-Lox-2 or~~ 8-Lox.
5. (Original) The nucleic acid segment of claim 1, further defined as a DNA segment.
6. (Original) A recombinant host cell comprising the nucleic acid segment of claim 1.
7. (Currently Canceled).
8. (Original) The nucleic acid segment of claim 4, wherein the isolated gene encodes 8-Lox.

Serial No.: 10/716,204

9. (Currently Canceled).
10. (Currently Canceled).
11. (Original) The nucleic acid segment of claim 8, wherein the isolated gene encodes 8-Lox comprising the amino acid sequence of SEQ ID NO:4.
12. (Original) The nucleic acid segment of claim 11, further defined as comprising 8-Lox-coding nucleic acid sequence of SEQ ID NO:3.
13. (Original) The nucleic acid segment of claim 5, wherein the isolated gene is, positioned under the control of a promoter.
14. (Original) The nucleic acid segment of claim 13, further defined as a recombinant vector which comprises the isolated gene.
15. (Original) The nucleic acid segment of claim 14, wherein the vector is a recombinant expression vector.
16. (Original) The recombinant host cell of claim 6, wherein the host cell is a procaryotic cell.
17. (Original) The recombinant host cell of claim 6, wherein the host cell is a eucaryotic cell.
18. (Currently Amended) A nucleic acid segment which comprises at least a 10 nucleotide long contiguous stretch of the nucleic acid sequence of ~~SEQ NO:1~~ or SEQ ID NO:3.

Serial No.: 10/716,204

19. (Currently Amended) The nucleic acid segment of claim 18, further defined as comprising at least a 15 nucleotide long contiguous stretch of the nucleic acid sequence of ~~SEQ ID NO:1~~ or SEQ ID NO:3.
20. (Currently Amended) The nucleic acid segment of claim 19, further defined as comprising at least a 20 nucleotide long contiguous stretch of the nucleic acid sequence of ~~SEQ ID NO:1~~ or SEQ ID NO:3.
21. (Original) The nucleic acid segment of claim 19, further defined as a nucleic acid fragment of up to 10,000 basepairs in length.
22. (Currently Amended) The nucleic acid segment of claim 20, further defined as comprising at least a 30 nucleotide long contiguous stretch of the nucleic acid sequence of ~~SEQ ID NO:1~~ or SEQ ID NO:3.
23. (Currently Amended) The nucleic acid segment of claim 22, further defined as comprising at least a 50 nucleotide long contiguous stretch of the nucleic acid sequence of ~~SEQ ID NO:1~~ or SEQ ID NO:3.
24. (Currently Amended) The nucleic acid segment of claim 23, further defined as comprising at least a 100 nucleotide long contiguous stretch of the nucleic acid sequence of ~~SEQ ID NO:1~~ or SEQ ID NO:3.
25. (Currently Amended) The nucleic acid segment of claim 24, further defined as comprising at least a 1000 nucleotide long contiguous stretch of the nucleic acid sequence of ~~SEQ ID NO:1~~ or SEQ ID NO:3.
26. (Currently Amended) The nucleic acid segment of claim 25, further defined as having the nucleic acid sequence of ~~SEQ ID NO:1~~ or SEQ ID NO:3.

Serial No.: 10/716,204

27. (Original) The nucleic acid segment of claim 21, further defined as a nucleic acid fragment of up to 1,000 basepairs in length.
28. (Original) The nucleic acid segment of claim 27, further defined as a nucleic acid fragment of up to 500 basepairs in length.
29. (Original) The nucleic acid segment of claim 28, further defined as a nucleic acid fragment of up to 50 basepairs in length.
30. (Original) A method of preparing a lipoxygenase polypeptide, comprising: transforming a cell with the nucleic acid of claim 1 to produce a lipoxygenase under conditions suitable for the expression of said polypeptide.
31. (Original) A process of detecting in a sample an RNA that encodes the lipoxygenase polypeptide encoded by the nucleic acid of claim 1, said process comprising the steps of:
- (a) contacting said sample under hybridizing conditions with the nucleic acid segment of claim 1 to form a duplex; and
 - (b) detecting the presence of said duplex
- 32 - 37 (Canceled).
38. (Currently Amended) An isolated and purified antibody capable of specifically binding to ~~the polypeptide of claim 32~~ a polypeptide capable of converting arachidonic acid exclusively to 15S-hydroperoxyeicosatetraenoic acid, said lipoxygenase containing an iron ligand comprising a serine.

Serial No.: 10/716,204

39. (Original) The antibody of claim 38 which is a monoclonal antibody.
40. (Original) The antibody of claim 38 which is a polyclonal antibody.
41. (Original) A hybridoma cell line which produces the monoclonal antibody of claim 39.
42. (Original) An isolated and purified antibody capable of neutralizing the biological activity of the polypeptide of claim 32.
43. (Original) The antibody of claim 42 which is a monoclonal antibody.
44. (Original) The antibody of claim 42 which is a polyclonal antibody.
45. (Original) A hybridoma cell line which produces the monoclonal antibody of claim 43.
46. (Currently Amended) A process of producing an antibody immunoreactive with a lipoxigenase polypeptide, the process comprising steps of
 - (a) transfecting a recombinant host cell with ~~the~~ a polynucleotide of claim 1, which encodes a lipoxigenase polypeptide;
 - (b) culturing the host cell under conditions sufficient for expression of the polypeptide;
 - (c) recovering the polypeptide; and
 - (d) preparing the antibody to the polypeptide.
47. (Original) The process of claim 46, wherein the polypeptide comprises SEQ ID NO:2.

Serial No.: 10/716,204

48. (Original) The process of claim 46, wherein the polynucleotide comprises SEQ ID NO:1 or comprises SEQ ID NO:3.
49. (Original) An antibody produced by the process of claim 46
50. (Original) A process of detecting a lipoxygenase polypeptide, the process comprising immunoreacting the polypeptide with an antibody prepared according the process of claim 46 to form an antibody-polypeptide conjugate, and detecting the conjugate.
51. (Original) A process of detecting a messenger RNA transcript that encodes a lipoxygenase polypeptide, the process comprising the steps of hybridizing the messenger RNA transcript with the polynucleotide of claim 1 to form a duplex; and detecting the duplex.
52. (Original) A process of detecting a DNA molecule that encodes a lipoxygenase polypeptide, the process comprising the steps of hybridizing DNA molecules with the polynucleotide of claim 1 to form a duplex; and detecting the duplex.
53. (Currently Amended) ~~A diagnostic~~ An assay kit for detecting the presence of a lipoxygenase polypeptide in a biological sample, the kit comprising a first container containing a first antibody capable of immunoreacting with a lipoxygenase polypeptide encoded by the polynucleotide of claim 1, wherein the first antibody is present in an amount sufficient to perform at least one assay.
54. (Original) An assay kit of claim 53, further comprising a second container containing a second antibody that immunoreacts with the first antibody.

Serial No.: 10/716,204

55. (Original) An assay kit of claim 54, wherein the first antibody and the second antibody comprise monoclonal antibodies.
56. (Original) An assay kit of claim 55, wherein the first antibody is affixed to a solid support.
57. (Original) An assay kit of claim 55, wherein the first and second antibodies each comprise an indicator.
58. (Original) An assay kit of claim 57, wherein the indicator is a radioactive label or an enzyme.
59. (Currently Amended) ~~A diagnostic~~ An assay kit for detecting the presence, in biological samples, of a lipoxxygenase polypeptide, the kit comprising a first container that contains a polynucleotide identical or complimentary to a segment of at least ten contiguous nucleotide bases of the polynucleotide of claim 1.
60. (Canceled).
61. (Original) A screening assay for identifying a compound that affects arachidonic acid metabolism in a cell, comprising the steps of:
 - (a) establishing replicate test and control cultures of cells that express a lipoxxygenasepolypeptide encoded by the polynucleotide of claim 1;
 - (b) administering a candidate compound to the cells in the test culture but not the control culture;
 - (c) measuring hydroperoxyeicosatetraenoic acid levels in the test and the control cultures; and

Serial No.: 10/716,204

- (d) determining that the candidate compound affects arachidonic acid metabolism in a cell if the hydroperoxyeicosatetraenoic acid level measured for the test culture is less or greater than the hydroperoxyeicosatetraenoic acid level measured for the control culture.
62. (Currently Amended) An assay method of claim 61, wherein the lipoxygenase polypeptide comprises 15-Lox-2.
63. (Currently Amended) An assay method of claim 61, wherein the lipoxygenase polypeptide comprises 8-Lox.
